PROFESSIONAL SUMMARY

Computer Science and Engineering student at DEPSTAR, CHARUSAT, with hands-on experience in the Data Science lifecycle — data pre-processing, EDA, and model building. Built real-world ML projects including a used car price prediction web app. Proficient in Python, C++, and core AI/ML libraries. Seeking opportunities to apply and grow my skills in intelligent systems and data-driven applications.

EDUCATION

Bachelor of Technology — Computer Science & Engineering

CGPA: 7.62 / 10.0

DEPSTAR, CHARUSAT University, Anand, Gujarat | 2024 – 2028

Class XII (HSC) — Gujarat Board

Percentage: 80.15%

Hebron Higher Secondary School, Gujarat | 2024

TECHNICAL SKILLS

Languages: Python, C, C++, Java, SQL

Web Technologies: HTML, CSS, JavaScript, React.js, PHP, FastAPI

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Machine Learning: Regression, Classification, Feature Engineering, Model Training & Evaluation, EDA

Tools & Platforms: VS Code, Git, GitHub, Jupyter Notebook, Vercel

PROJECTS

E-Commerce Inventory Management System | [GitHub](#)

C++ · OOP

- Designed a C++ OOP-based inventory system enabling users to view products, manage cart, and generate order summaries — demonstrating core object-oriented design principles.

Used Car Price Prediction & Insights System | [Live Demo](#) | [GitHub](#)

Python · ML · Vercel

- Situation: Needed accurate used car price prediction from raw, unstructured market data. Task: Build an end-to-end ML pipeline with clean UI and real-time prediction.
- Action: Applied feature engineering, hyper parameter tuning (Scikit-learn), and built a FastAPI backend; deployed on Vercel. Result: Live web app delivering real-time price predictions.

Personal Portfolio Website | [Live Demo](#) | [GitHub](#)

HTML · CSS · JavaScript

- Built a fully responsive portfolio with zero frameworks, featuring typing animation, smart naval, and certificate light box with category filter, and scroll-reveal effects — displaying 27 Coursera certifications and ML projects.

CERTIFICATIONS

Data Structures and Algorithms — Coursera

[View Certificate](#)

IBM Data Science Professional Certificate — Coursera

[View Certificate](#)

AI for Future — Edunet Foundation (AICTE Approved)

[View Certificate](#)

ACHIEVEMENTS & EXTRA-CURRICULARS

- Completed 27+ Coursera certifications in Data Science, Machine Learning, and Web Development demonstrating strong self-learning drive.
- Deployed production-grade ML web application (CarDealDekho) used for real-time used car price prediction, accessible publicly on Vercel.
- Actively contributing to open-source projects on GitHub with consistent commit history across multiple repositories.
