

YUG PRAVINBHAI UMRANIA

+91 90546 04499 | Gujarat, India | umraniayug4507@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

OBJECTIVE

Computer Science and Engineering student at CHARUSAT with practical experience in Data Analytics, Machine Learning, and Web Development. Completed a Data Analytics Internship at Oasis Infobyte and developed projects involving EDA, customer segmentation, sentiment analysis, and predictive modeling. Passionate about building data-driven solutions and continuously expanding expertise in AI/ML.

EDUCATION

DEPSTAR, CHARUSAT University, Anand, Gujarat 2024 – 2028
Bachelor of Technology – Computer Science & Engineering CGPA: 7.65 / 10.0

Hebron Higher Secondary School, Gujarat 2024
Class XII (HSC) – Gujarat Board Percentage: 80.15%

TECHNICAL SKILLS

- **Languages:** Python, C, C++, Java, SQL
- **Web Technologies:** HTML, CSS, JavaScript, React.js, PHP, FastAPI, Supabase, Vitest, TypeScript
- **Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
- **Machine Learning:** Regression, Classification, Feature Engineering, Model Training & Evaluation, EDA
- **Tools & Platforms:** VS Code, Git, GitHub, Jupyter Notebook, Vercel

EXPERIENCE

Oasis Infobyte Remote, Delhi
Data Analytics Intern ([GitHub](#)) May 2026 – Jun 2026

- Performed Exploratory Data Analysis (EDA) on retail datasets using Python and Pandas.
- Developed Customer Segmentation and Sentiment Analysis projects.
- Created data visualizations using Matplotlib and Seaborn.
- Presented project findings through reports and presentations.

Trionic Technologies LLP Remote, Mehsana
AI/ML Intern ([GitHub](#)) May 2026 – Jun 2026

- Designed and implemented an Agent-Tracer observability module for a multilingual agentic AI platform.
- Built PII redaction layer, Supabase persistence, and Tracer.summary() analytics function covering tokens, cost, and p95 latency per AI agent call.
- Shipped 9 pull requests across a 35+ intern monorepo with CI passing and maintained project documentation using Git and GitHub.

PROJECTS

E-Commerce Inventory Management System | C++, OOP [GitHub](#)

- Designed a C++ OOP-based inventory system enabling users to view products, manage a shopping cart, and generate order summaries, effectively demonstrating core object-oriented design principles.

Used Car Price Prediction & Insights System | Python, ML, Vercel [Live Demo](#) | [GitHub](#)

- **Situation/Task:** Needed accurate used car price prediction from raw, unstructured market data to build an end-to-end ML pipeline with a clean user interface and real-time prediction capabilities.
- **Action:** Applied advanced feature engineering and hyper-parameter tuning (Scikit-learn), achieving an accuracy of 92.12% using the XGBoost ML Model; built a robust FastAPI backend and deployed the stack on Vercel.

Personal Portfolio Website | HTML, CSS, JavaScript [Live Demo](#) | [GitHub](#)

- Built a fully responsive portfolio with zero frameworks, featuring a typing animation, smart navigation, and certificate lightbox with a category filter and scroll-reveal effects to display 27 Coursera certifications and ML projects.

CERTIFICATIONS

- Data Structures and Algorithms – Coursera [View Certificate](#)
- IBM Data Science Professional Certificate – Coursera [View Certificate](#)
- AI for Future – Edunet Foundation (AICTE Approved) [View Certificate](#)

ACHIEVEMENTS & EXTRA-CURRICULARS

- Completed 27+ Coursera certifications in Data Science, Machine Learning, and Web Development, demonstrating a strong self-learning drive.
- Actively contributing to open-source projects on GitHub with a consistent commit history across multiple repositories.
